EDUCATION

University of Ottawa

Bachelor of Science in Computer Science

Ottawa, ON

Sep. 2023 – May 2027

EXPERIENCE

Data Scientist

May 2026 – Present

Employment and Social Development Canada (ESDC)

Gatineau, QC

- Migrated tens of thousands of records from Excel to PostgreSQL and developed Python pipelines to automate recurring database updates
- Built Python automation tools to process high volumes of Outlook emails, extract structured data, and streamline repetitive workflows
- Created Power BI dashboards and regression visualizations to analyze operational data and support data-driven decision-making
- Authored technical documentation for data pipelines, automation tools, database processes, and team workflows

Data Analyst Volunteer

May 2024 – Aug. 2024

Ottawa Community Housing

Ottawa, ON

- Cleaned and organized internal datasets related to tenant service requests and maintenance tracking
- Built Power BI reports to visualize monthly request volumes, response timelines, and operational trends
- Worked with real-world housing data to improve the accessibility and interpretation of internal reporting

Barback

Apr. 2024 – Present

10fourteen

Ottawa, ON

- Support bartenders and floor staff in a fast-paced, high-volume environment during peak service periods
- Maintain efficient bar operations by anticipating needs, restocking supplies, and coordinating during rushes

PROJECTS

Smash Tournament Locator | *JavaScript, React, Firebase, Google Maps API*

- Built a web application that helps users discover local Super Smash Bros. tournaments by region and date
- Integrated external event data and the Google Maps API to display tournament locations and geographic information
- Designed a responsive, mobile-friendly interface and deployed the application using Firebase Hosting

Wii Portfolio Website | *React, CSS, Vercel*

- Developed a personal portfolio website inspired by the Nintendo Wii interface to showcase projects and professional experience
- Built animated, interactive React components and navigation tiles with responsive styling
- Deployed using Vercel with automated builds and deployments on Git pushes

Spotify Listening Stats | *Python, Spotify Web API, Pandas*

- Built a Python application to retrieve users' top artists, tracks, genres, and listening statistics through the Spotify Web API
- Implemented OAuth authentication and processed listening history using Pandas
- Analyzed user listening behavior and trends through automated data processing and aggregation

TECHNICAL SKILLS

Languages: Python, Java, SQL (PostgreSQL), JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, FastAPI, JUnit, WordPress

Data & Analytics: Pandas, NumPy, Matplotlib, Power BI, Excel

Developer Tools: Git, Docker, GitHub Actions, Terraform, Firebase, Vercel, VS Code

Cloud: AWS (S3, EC2, Lambda, CloudFront, Route 53)
